Introduction to problem (You choose)

Introduction:

In this project we creating chatbot dialog flow. It is artificial intelligent awareness system about Covid-19. One can ask questions about covid-19 and it will answer.

Description:

We are building a chatbot that will give its users awareness about covid-19.

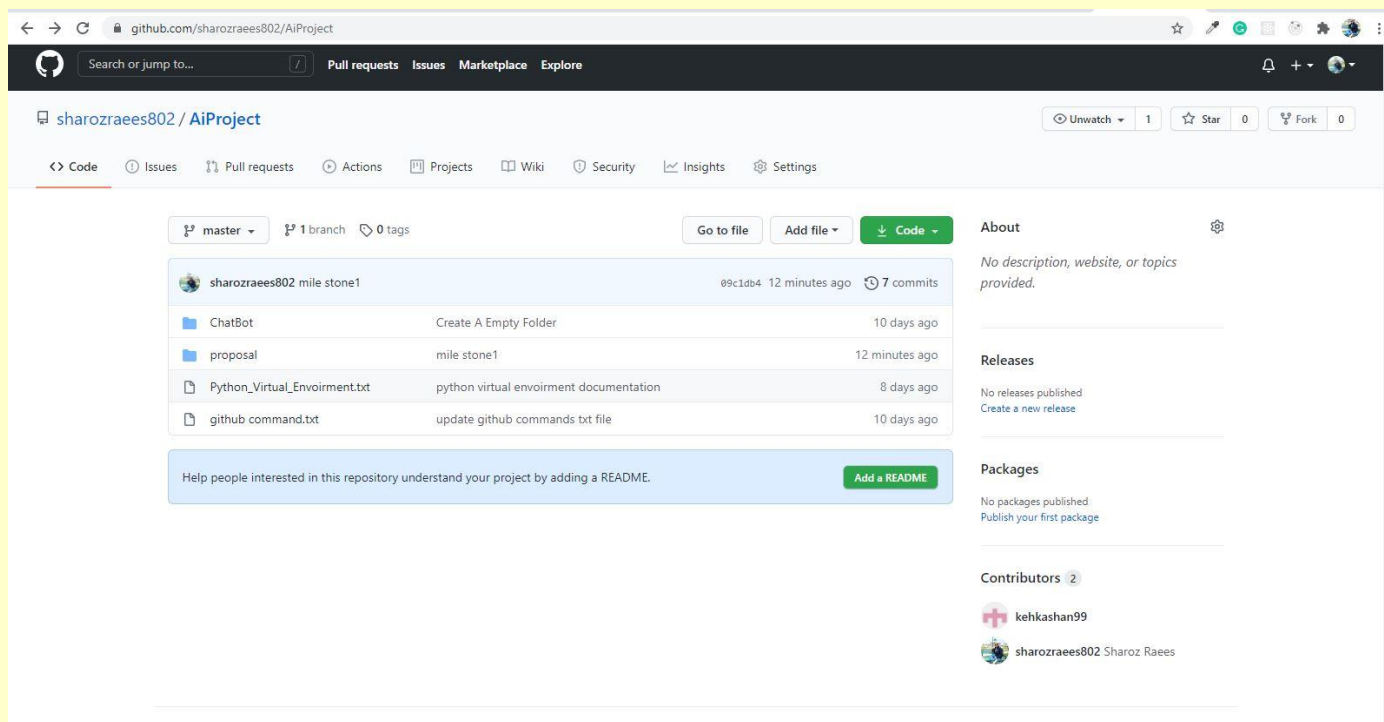

What is a Chatbot?

Interacts through instant messaging, artificially replicating the patterns of human interactions.

What is dialog flow?

Dialog flow is a natural language understanding platform used to design and integrate a conversational user interface into mobile apps, web applications, devices, bots, interactive voice response systems and related uses.

GitHub Picture

Software Requirements

- Version Control Git and GitHub
- Visual Studio Code
- Jupyter Notebook
- Mongo Db atlas

Project Planning

	Week1	Week2	Week3	Week4	Week5	Week6	Week7	Week8	Week9
Google Dialogflow & NLU									
Flask/python, API, MongoDB									
Testing & Deployment									

Expected Result: our project will be complete in 9th week

Code Language:

We will use Python, Flask, MongoDB, Rapid API, Dialog Flow API
